

Join us for our **STEM Design Academy** !

When: Friday, February 12th, 2016

8 a.m.—2 p.m.

Where: Arkansas 4H (C. A. Vines) Center, Little Rock, AR (Ferndale area)

Discover
Develop
Design

Participants will take part in hands-on, project-based, and ‘real world’ problem-solving activities that are designed to increase children and youth’s knowledge of Science, Technology, Engineering, and Math (STEM). The activities will help program staff challenge and encourage their youth to collaborate, connect, and problem solve with their peers.

Register today at http://professionalregistry.astate.edu/train_register/train3.asp?id=53861 . Registration is free; lunch is provided!

This workshop is designed for Out-of-School Time professionals working with children and youth ages 5-19. Presenters will provide hands-on, fun activities to highlight the design engineering process and help participants make connections to the Next Generation Science Standards.
