

Join us for our **STEM Design Academies**

Friday, March 4th (8 a.m.—2 p.m.)

Bentonville, AR—Amazeum

Friday, March 11th, 2016 (8 a.m.—2 p.m.)

Jonesboro, AR—Cooper Alumni Center, Astate

Discover
Develop
Design

Participants will take part in hands-on, project-based, and ‘real world’ problem-solving activities that are designed to increase children and youth’s knowledge of Science, Technology, Engineering, and Math (STEM). The activities will help program staff challenge and encourage their youth to collaborate, connect, and problem solve with their peers.

This workshop is designed for Out-of-School Time professionals working with children and youth ages 5-19. Presenters will provide hands-on, fun activities to highlight the design engineering process and help participants make connections to the Next Generation Science Standards.

Register today! Registration is free; lunch is provided!
